

GOVERNMENT CLOUD · MICROSOFT 365 GCC HIGH · DOD

Modern SharePoint intranet for GCC High.

A turnkey intranet that is **intuitive, branded, and secure**, built for agencies and contractors who cannot compromise on compliance or usability. LightPath Intranet installs into the GCC High tenant you already operate, with a managed option in Azure US Government.

WHY NOT JUST DEFAULT SHAREPOINT IN GCC HIGH?

BUILT-IN SHAREPOINT IN GCC HIGH

- × Native SharePoint limits customization inside government cloud
- × Many intranet vendors never designed for gov cloud boundaries
- × Assessor expectations treated as an afterthought
- × Polished, navigable employee experience is hard to deliver

LIGHTPATH INTRANET

- ✓ Purpose-built for Microsoft 365 GCC High and DoD tenants
- ✓ SPFx web parts plus Azure Functions inside your boundary
- ✓ Branded, audience-targeted navigation and announcements
- ✓ Analytics-ready with tools your security team approves

CHOOSE YOUR DEPLOYMENT MODEL

SELF-HOSTED

In your GCC High tenant

Deploy with **SharePoint Framework (SPFx)** and an Azure Function App for configuration and dynamic services. Components and data stay under controls your security team already owns.

MANAGED SAAS

Azure US Government cloud

Prefer a turnkey service? LightPath runs as a **managed instance in Azure US Government**, operated to align with government-region expectations while you focus on content and adoption.

Backed by Privion's government cloud eligibility

MICROSOFT GOVERNMENT CLOUD

Category 2 & 3

Validated for U.S. Government entities and government-controlled data including CUI and ITAR. Validation ID 232204.

SAM.GOV

Active · All Awards

UEI XYA9NFDQ6PX9 · CAGE 234T9.
Registration expires July 20, 2027.

BUSINESS SIZE

Small business

Available as a small business subcontractor for primes, or direct to agency and state/local teams.

PARTNER PROGRAM

Microsoft AI Cloud Partner

Senior-led Microsoft 365, SharePoint, and Azure Government delivery inside your tenant.

Note: Category 2 and 3 validation establishes eligibility to purchase and operate in Microsoft Government Cloud (GCC and related offers). It is not a FedRAMP authorization, CMMC assessment, or security certification. Details and current registrations: priviontech.com/government

A PRIVION PRODUCT · PAGE 1 OF 2

Designed for compliance. Built for adoption.

Everything in one cohesive layer: navigation, branding, templates, and web parts, tuned for how agencies and contractors actually ship work.

KEY FEATURES

Custom branding

Company-specific logos, fonts, and colors so SharePoint feels like your organization, not a default template.

Mega menus & breadcrumbs

Structured navigation plus audience-aware rules so the right people see the right destinations.

Templates that ship

Patterns for departments, news, events, and people-style directory experiences, tuned for discovery.

Analytics-ready

Integrate Microsoft Clarity, Matomo, or other approved tools to measure engagement and usability.

Admin without dev queues

Configure navigation, branding, and features from the LightPath Admin experience. Fewer tickets, faster changes.

Modular SPFx web parts

Extend the intranet with compliant, tenant-scoped building blocks instead of one-off custom code.

DESIGNED FOR COMPLIANCE

- ✓ 100% designed for **Microsoft 365 GCC High and DoD** scenarios
- ✓ **Self-hosted:** components and configuration stay inside your tenant boundary
- ✓ **Managed option:** LightPath Intranet SaaS hosted in Azure US Government regions
- ✓ Aligned with common federal frameworks: **FedRAMP High, ITAR, CMMC, NIST 800-171** (validate with your assessor)

HOW WE DELIVER

1

Discover

- Kickoff and stakeholder alignment
- GCC High and Azure Government readiness
- Workshops: structure, navigation, branding

2

Configure

- Hub, sites, and audience targeting
- Branding, web parts, and page templates
- Admin, author, and SME training

3

Go live

- Content authoring and design review
- Cutover, publishing, and Teams integration
- Roadmap session and support handoff

Let's scope your rollout.

Timeline, deployment model, and support tier tailored to your tenant.
